PROFESSIONAL SUMMARY

With a decade of in-depth experience in C++ development, I specialize in designing and implementing robust software solutions across various platforms. My expertise includes multithreading, STL, and performance optimization. I excel in collaborative environments, employing Agile methodologies to deliver high-quality applications. My strong analytical skills and innovative approach ensure effective problem-solving and project success.

WORK EXPERIENCE

C++ Developer 📅 Jan / 2018-Ongoing
Seaside Innovations 📍 Santa Monica, CA

- 1. Developed and maintained C++ applications for financial institutions, enhancing transaction processing efficiency.
- 2. Designed and implemented modules for the TBMS Transaction Billing Management System, ensuring robust functionality and performance.
- 3. Analyzed product requirements to deliver tailored enhancements, driving customer satisfaction.
- 4. Created and optimized new software components to improve system integration.
- 5. Automated data extraction processes using advanced scripting techniques, significantly reducing manual effort.
- 6. Contributed to the development of Odoo applications, ensuring seamless customization and functionality.
- 7. Collaborated with cross-functional teams to deliver high-impact software solutions, adhering to project timelines.

C++ Developer 📅 Jan / 2015-Jan / 2018
Summit Peak Industries 📍 Denver, CO

- 1. Developed a web-based appointment scheduling system, improving client management for Atma IT Solutions.
- 2. Designed and implemented communication software for telecommunication servers, ensuring high reliability.
- 3. Created a C++ class for automated system updates, enhancing user experience.
- 4. Conducted system testing and documentation to ensure quality and compliance.
- 5. Collaborated with team members to streamline project workflows and improve efficiency.

EDUCATION

Bachelor of Science in Computer Science 📅 Jan / 2012-Jan / 2015
University of California 📍 Denver, CO

Focused on software development, data structures, and algorithms.

SKILLS

ACHIEVEMENTS

- 🌟 Reduced application load time by 30% through optimized C++ code.
- 🌟 Led a team to develop a multithreaded application, improving processing speed by 40%.
- 🌟 Implemented a robust error-handling mechanism that decreased system downtime by 25%.
